

# Need information on corporate restructuring ?

## CORPORATE RESTRUCTURING

Tap into an international network of corporate restructuring experts. **Corporate Restructuring** is a regularly updated database, not a journal. It's designed to transform your ability to find information to help you deal with the tax implications of core issues such as mergers and acquisitions, joint-ventures, restructuring, raising capital, securitisation and debt.

You can retrieve information by category, then by geographic region. There's also a section of Global Case Studies.

You'll also receive a service on **People & Deals**, keeping you informed about the latest company and transaction activity; a regular e-newsletter alerting you to the latest additions to the database; and daily tax and law news service.

Research a particular question using the Search Form.

Print an article or document you are viewing – or bookmark it.

Cutting the time it takes to find news and analysis, the innovative structure has information clearly organised into subject categories. Retrieve information by category then by geographic region.

See instantly news and analysis added to the database that week.
