AIDC Comprehensive Training

May
11-14,
2010

This highly-informative three-day workshop presented by UID Journal covers all aspects of Automatic Identification Data and Capture (AIDC) technologies including Part Marking Technologies, and Bar Code and US DoD requirements for item Unique Identification (UID) on serially controlled assets. Participants will learn how Part Marking (2D data matrix bar codes) and RFID are used throughout the industry to increase visibility. The workshop will also cover how Automated Information Technology is used to track assets and report items' pedigree data to the IUID registry. Participants will engage in valuable lectures, equipment labs sessions, and self-focused learning exercises led by instructors with more than 40 years of combined experience in the AIDC industry.
